

# LOK6 Series

## Isolation lock out kits

### Key features LOK6:

- Suitable for Red Spot style fuse holders
- Takes wide range of padlocks

### Features LOK6W:

- Suitable for Henley and Lucy service cut out fuse holders
- Suitable for Red Spot style fuse holders rated at 63A and 100A

### Features LOK6-200:

- Suitable for Red Spot style fuse holders bases rated at 200A & 400A

LOK6 is a lock off device for individual Red Spot fuse holder bases up to 100A and other similar designs following removal of the fuse carrier. LOK6W has been designed to fit Henley and Lucy Service Cut Outs and is also suitable for larger Red Spot holders rated at 63A and 100A. LOK6-200 is for Red Spot holders rated at 200A and 400A.

Many Red Spot style fuse holders, still in widespread use today, are made of brittle materials that can be fractured easily by the sharp grub screw found in conventional MCB / Fuse lock-off devices. The LOK6 Series uses an effective clamp system to grip the wall of the fuse holder base without risk of damage. The clamp system accommodates wall thicknesses from 2mm to 5mm with ease.

The device is clamped adjacent to the terminal at one end of the fuse holder, rendering it safe against accidental finger access. For added safety, the design includes an integral sliding cover which can be adjusted according to the fuse size/rating to reduce accidental finger access at the far end of the fuse holder base.

Material is a tough flame-retardant blend of polycarbonate+ABS for high impact strength and long term durability. Colour is bright yellow for easy identification.

All versions are suitable for use with a wide range of locking padlocks with shackles up to 7mm in diameter. Martindale recommends PAD11 or insulated shackle PAD21. Both available in a variety of colours.

The overall head height is low after installation, making it possible to close most cabinet doors if desired.

### **LOK6 Universal fuse carrier isolation lock**

Suitable for Red Spot and other similar fuse holders from 20A to 100A.

### **LOK6W**

Wide mounting universal fuse carrier isolation lock. The extendible design also makes it suitable for larger Red Spot fuse holders rated at 63A and 100A and other similar designs.

### **LOK6-200**

The LOK6-200 is suitable for locking out Red Spot style fuse holder bases rated at 200A or 400A and can also be used for lower current ratings in larger dimension fuse holders.
