Gas-Tec Trigger Survey Unit

Pipeline / Vehicle Survey Kit

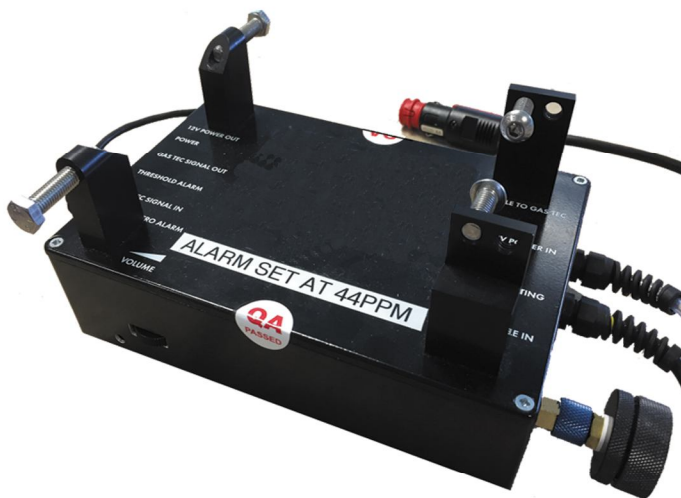

Gas-Tec Trigger Survey Unit

The Trigger Survey Unit Kit converts a portable Gas-Tec flame ionisation detector into a mobile system that can be quickly and easily installed into any vehicle to do surveying.

The Trigger Survey Unit can find a leak or be used where a leak is suspected or reported. It gives both audible and visual indications and survey investigations can be done up to a maximum of 30kph with the Trigger Survey Unit mounted with a Gas-Tec instrument.

The survey kit also includes a charger / power lead, 2 water / particulate filter units, a four inlet, light weight boom assembly which fits to the front of the survey vehicle. a pump to draw samples from the boom to the Trigger Survey Unit / Gas-Tec inside the vehicle and an output socket for a recorder or data logger.

Specifications:

Dimensions	
Controller	225 x 150 x 55mm (50mm pillars)
Boom Assembly	225 x 150 x 55mm (50mm pillars)
Weight	
Controller	1kg
Boom Assembly	1kg
Sample Points	4
Power	Via cigarette lighter socket
Output	0 - 2v (2mV/ppm)
Max Vehicle Speed	30kph
Gas-Tec Range	0 - 10,000ppm hydrocarbons 0 - 100,000ppm with range extender (Mk4 Only)
Gas-Tec Operating Time	60 hours (on one hydrogen cylinder)
