

Advanced features for professional applications

Features

- · Innovative touchscreen
- · Automatic recognition of the impact (rebound) sensor connected to the HMO.
- · Mobility: In comparison with stationary table-top devices and hardness testing devices with internal sensor, the SAUTER HMO. offers the highest level of mobility and flexibility
- All measurement directions possible (360°) thanks to an automatic compensation function
- · USB interface for connection to the printer and charging the batteries
- II Standard block for calibration included
- Delivered in a robust carrying case
- Internal memory up to 800 values
- · Mini statistics function: Displays the measure value, the average value, the difference between the maximum and minimum values, date and time
- · Measurement value display: Rockwell (B & C), Vickers (HV), Brinell (HB), Leeb (HL), tensile strength (MPa)
- · Automatic unit conversion: The measuring result is automatically converted into all specified hardness units

Technical data

- Precision: 1 % 800 HLD (± 6 HLD)
- Measuring range tensile strength: 375-2639 MPa (steel)
- · Min. sample weight on a solid and stable support:

Sensor D + DC: 3 kg Sensor G: 15 kg

- Minimum sample material thickness: Sensor D + DC: 8 mm Sensor G: 10 mm
- Minimum sample radius (concave/convex): 50 mm (with support ring: 10 mm)
- Dimensions W×D×H 83×24×135 mm
- · Rechargeable battery pack internal, operating time up to 50 h
- · Mains adapter included
- Net weight approx. 228 g

Accessories

- Operation by rechargeable battery pack, operating time up to 50 h, SAUTER HMO-A03
- External impact sensor Type D, as standard, can be reordered, SAUTER AHMO D
- 3 External impact sensor Type DC. Short impact sensor for tests in holes or hollowed objects, SAUTER AHMO DC
- External impact sensor Type G. High energy sensor: 900 % impact energy compared to type D, SAUTER AHMO G
- Support rings for bended testing samples available on request, SAUTER AHMR 01
- Impact body, SAUTER AHMO D01
- · Connection cable, SAUTER HMO-A04
- Test block Type D/DC, 90×50 mm (± 1 mm), net weight < 3 kg, hardness range 790 ± 40 HL, SAUTER AHMO D02 630 ± 40 HL, SAUTER AHMO D03 530 ± 40 HL, SAUTER AHMO D04
- 6 Wireless IR printer standard for o'site printing of measurement protocols (rechargeable battery operated), can be reordered, SAUTER AHN-02
- Paper roll, 1 piece, for SAUTER AHN-02, **SAUTER ATU-US11**

SAUTER Pictograms:

Adjusting program (CAL):

For quick setting of the balance's accuracy. External adjusting weight required.

Control outputs

(optocoupler, digital I/O):

to connect relays, signal lamps, valves, etc.

Rechargeable battery pack:

rechargeable set.

PEAK

Calibration block:

Peak hold function:

measuring process.

standard for adjusting or correcting the measuring device.

Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements.

Mains adapter:

230V/50Hz in standard version for EU. On request GB, AUS or USA version available.

Statistics:

using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

Power supply:

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or USA on request.

Motorised drive:

The mechanical movement is carried out by a electric motor.

SCAN

Scan mode:

Push and Pull:

continuous capture and display of measurements.

capturing a peak value within a

PRINT

PC Software:

Printer:

to transfer the measurements from the device to a PC.

a printer can be connected to the

device to print out the measurements.

Motorised drive: The mechanical movement is carried out

by a synchronous motor (stepper).

DAkkS calibration possible:

is shown in days in the pictogram.

Length measurement:

and compression forces.

captures the geometric dimensions of a test object or the movement during a test process.

the measuring device can capture tension

GLP/ISO record keeping:

of measurements with date, time and serial number. Only with SAUTER printers.

Fast-Move:

the total length of travel can be covered by a single lever movement.

MEMORY

Focus function:

Internal memory:

to save measurements

in the device memory.

increases the measuring accuracy of a device within a defined measuring range.

Measuring units:

Weighing units can be switched to e.g. non-metric at the touch of a key. Please refer to website for more details.

Measuring with tolerance range

(limit-setting function): Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

DAkkS

+3 DAYS

Factory calibration:

The time required for factory calibration is specified in the pictogram.

The time required for DAkkS calibration

Data interface RS-232:

bidirectional, for connection of printer and PC.

Resets the display to "0".

Package shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

Pallet shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

Data interface USB:

To connect the balance to a printer, PC or other peripheral devices.

Data interface Infrared:

To transfer data from the balance to a printer, PC or other peripheral devices.

Battery operation:

Ready for battery operation. The battery type is specified for each device.
