FLUKE®

## Laser Level Replacement Glass Inserts

### **Layout. Level. Build.™**

The new housing glass inserts (PLS HGI-series) save contractors time and money by offering a quick solution to broken laser level glass caused by falling items or a dropped laser level. \*

Often a laser level is out-of-warranty and must be replaced at full cost if the glass breaks from a drop or through impact with a falling object. With the **PLS HGI-series replacement glass**, customers can remove the broken windows and frame from our latest model PLS 3, 5, 6, or 180 by unscrewing just five screws. \*\*

PLS is now offering replacement glass inserts for the PLS 3R, 3G, PLS 5R, 5G PLS 6R, 6G, PLS 180R, 180G.

To ensure successful glass installation:

\* Laser glass replacement should be conducted in a dust-free environment such as a work trailer, work vehicle, tool shop, office, or home.

\*\* Before replacing glass, make every effort to confirm the laser level is still within specified accuracy and that all lasers are functioning properly.

### **Benefits**

- No need to replace a laser level completely if the glass breaks
- Reduce job site delays caused from dropped laser levels by quickly replacing broken glass on the job site.
- Glass inserts protects inner mechanism from dust and water.
